A Message from the President

Dear Texas Chess Players,

On March 20-22, the 2009 Texas Scholastic Championship will be held in McAllen, see <http://www.2009texaschesstourney.com/>.

This year's tournament is promising for several reasons:

First, it is the first time will be held in the Rio Grande Valley. This is truly a proud moment for the many tournament directors, parents, and coaches who worked to bring this tournament down south. Additionally, it further assimilates the Rio Grande Valley in the chess tournament rotation list.

Second, there will be a University of Texas at Dallas (UTD) four-year scholarship to the overall winner of the High School section. In addition, the San Benito Independent School District will award \$1,500 scholarships to the top male & female finishers of the high school and collegiate section.

Third, the Chess in Education conference is scheduled to have an all-star line up from chess program members at The University of Texas at Brownsville (UTB). Members of the UTB program who will contribute to the conference include: GM Gilberto Hernandez, IM Daniel Fernandez, IM Maurico Flores, WFM Nelly Estrada, and UTB Chess Program Director Russell Harwood.

I wish the best of luck to all participants. I also invite everyone to the annual scholastic TCA Meeting, which will be held on Saturday, March 21 at 7:30 p.m.

Cordially,
Clemente Rendon
TCA President

IM Mark Diesen (1957-2008)

Former world junior champion Mark Diesen, 51, passed away suddenly last Dec. 9 in Conroe.

He was born in Buffalo, New York. His father, Carl Diesen, was a strong expert mostly active in postal play. Mark learned chess at age nine, and quickly progressed. In 1972 he became the nation's youngest master at age 15. The next year he placed first at the Hastings Challengers (1973-74). He won the U.S. Junior Championship in 1976 from a very strong field including de Firmian, Fedorowicz, Henley, Wilder, McCambridge and Rohde.

One participant, Ken Regan, recalls: "What I remember most about Mark was his mild-manneredness, amid a raucous ego-and-teen-hormones-driven crowd. What also made him seem mature beyond his years was that (like Seirawan) he played in an advanced positional style."

Later that year he won the World Junior Championship in Groningen, NLD, and qualified for the IM title.

16 lines

Diesen winning the 1976 world junior title

He played in many European tournaments in the 70s, making at least one GM norm. In 1980 he suffered a fall (both physical and chessic) at the US Championship and had to withdraw. This was his last top-level competition.

In 1981 he went back to school and got a degree in chemical engineering at the University of Tennessee. He worked as a reservoir engineer for Shell Oil, Pennzoil and Noble Energy, first in New Orleans and later in the Houston area. He was married, and had three daughters.

He was Louisiana state champion in 1986, 1987 and 1988. After moving to Texas he won the state championship in 2001 and 2003, and the Southwest Open in 2001.

(Continued next page)

In recent years he lectured on ICC and Chess FM.

IM Mark Ginsburg, a personal friend of Diesen, has written a two-part appreciation of Diesen and his games, which can be found on *US Chess Online*. He writes:

Mark's play reminded me of GM Huebner's style – take what you are given, and display accuracy converting superior positions. He also practiced controlled aggression – attack when the position demands it – this latter quality is reminiscent of GM Portisch. All in all, he struck me as a very “European” player – worlds apart from the piece-sacking barbarians one often runs into at American Swisses. I have found that studying this type of play is quite important to improve tournament results. The “iron logic” of Smyslov, Botvinnik, Petrosian, and so on can be distilled into simply taking what one is given and then putting the opponent in an iron vice of technique. In Diesen's games, we see this time and again.

Diesen was buried in Knoxville, Tenn. His family requested that memorial gifts be in the form of donations to the U.S. Chess Trust.

Advance Motions for the TCA Scholastic Meeting

to be held March 21 in Brownsville, 3 p.m.

The following advance motions are from Luis Salinas.

Motion 1: Change Article IX Section 1 P from:

P. Texas Grade Championships. This event shall be held in the fall concurrently with the Texas Collegiate Championship, with a separate tournament for each grade K-12. There shall be individual and team trophies. A team shall consist of any three players from the same school, and may be designated at the conclusion of the tournament to include the top scorers from that school. Sections may be combined if deemed necessary, but trophies shall be awarded for all grades represented. This is a Major Event.

to

P. Texas Grade Championships. This event shall be held in the fall concurrently with the Texas Collegiate Championship, with a separate tournament for each grade K-12. **Grades 11 and 12 may be combined if there is a scholarship at stake, but players are not eligible for trophies from another grade.** There shall be individual and team trophies. A team shall consist of any three players from the same school, and may be designated at the

conclusion of the tournament to include the top scorers from that school. Sections may be combined if deemed necessary, but trophies shall be awarded for all grades represented. This is a Major Event.

Rationale: The UTD administration does not like to award scholarships to sections that are too small. Combining the sections increases the number of players.

Motion 2: Motion 1 above goes into effect immediately.

Motion 3: [That] the Texas Chess Association hold a Chess In Education Workshop during the 2010 State Scholastic. The budget for the Workshop shall be the same as the budget passed for the Chess In Education during the 2009 State Scholastic.

Texas Team champions: *Mate We Can Believe In*

San Antonio team edges out Austin's *The Simpsons* on tiebreaks

The 2009 Texas Team Championship drew 14 teams, not quite a record (that was 16 teams in 2003) but well above expectations. When Mark Dejmek phoned from Houston in early January to say he had trouble scraping together a team on Superbowl weekend (it's *what?!?*), we were more than a little concerned about turnout. While some years look like a San Antonio team championship, this time there were representatives from Brownsville, Fort Worth, Austin, Brownsville, and yes, Houston. We also had a former Texas state champion, Jerry Milburn of Fort Worth, playing in his first tournament in roughly 30 years.

The top-rated team was *Longhorns* (2121) from UT-Austin, which included three masters (Aibek Isakov, Alexander Chua and Deepyman Datta) and B player Glenn Perry. However, they were derailed in Round 2 by another Austin team, *The Simpsons: Episode 1: Escape from the Nuthouse* (2048) with Michael Langer, Alexander Balkum, Michael Simpson and Seth Thompson. Isakov's win over Langer was the only victory for the *Longhorns* in that match.

Mate We Can Believe In (Selby Anderson, Don Marcott, Josito Dondon and J.P. Hyltin - 2105), advanced to a final showdown with *The Simpsons* after defeating Fort Worth-based *A Rose with Three Thorns* (Nicholas Schoonmaker, Jerry Milburn, Rick Hodges and Julie O'Neill - 2050). *The Simpsons* won their Rd. 3 mismatch with *Chess Assassins* (1833) in a shutout.

The title match in Rd. 4 saw Anderson repeat a tricky line in his specialty, the Center Counter, and Langer after much work reached a won ending. Next board down, Marcott got the worse of his Leningrad

Attack against Balkum's Nimzo-Indian. However, on the lower boards *Mate* cleaned up, as Simpson lost to Dondon and Hyltin won with a little help from Seth Thompson, who allowed a helpmate at the end.

So the two teams tied their match, and the rest was up to the tiebreaks (U.S. Amateur Team). Considering that *The Simpsons* was at the top of the computer standings after three rounds, and that their cumulative scores at the end came out two points higher than *Mate*, it was considered foreordained that the computer tiebreaks after the last games were finished would clearly make the trophy Austin-bound. And so without waiting for all the cows to come home, I gave the trophy to Michael Langer and he drove back to Austin in time to catch the end of the Superbowl.

Alas, The Simpsons' Rd. 3 opponent *Chess Assassins* forfeited their last round match in protest of what team captain Alok Kumar considered an unacceptable computer-generated pairing. It appears he had a reasonable gripe: working with cards, I came up with the same pairings he proposed. Unfortunately, TD Martin Gordon had allowed the lower board matches to start early, and was not going to stop the games.

So their quadruple forfeit probably tipped the scales for *Mate We Can Believe In*, which edged out *The Simpsons* on US Amateur Team tiebreaks by 26.5 to 24.5. It was an ironic conclusion to a great tournament, seemingly no less ironic than the concluding half-minute of the Superbowl where the Cardinals had victory snatched away by a Steelers touchdown.

Trailing the winners by half a point at 3-1 were *Longhorns* and *Rexreport.com* (Ernesto Malazarte,

Gregg Stanley, Mitch Vergara and Martin Gordon).

The winning U1900 team was *Future Masters* (2.5) with Shawn Noland and three top area scholastic players: Nathanael Lozano, Daniel Lozano and Quintin Noland.

Four teams shared second U1900 with 2 points: *When Amigos and Gringos Unite, Waiting for Godot, Madoff with the King* and *The Piece Keepers*.

Martin Gordon directed for the San Antonio Chess Club, with assistance from Selby Anderson.

Black has equalized with 10... Bb7, said Isakov. The text bore the brunt of the blame for what follows, unjustly it appears.

11.a4 b4?!

This, not 10...Qc7, is the cause of Black's problems. After 11... bxa4 12.Bxa4 Rb8 he is about equal. 12.Nd5 Nxd5?

Since White now has the option to play 7.Ne2(!), it is more accurate for Black to play 6...Bxc3+ first.

7.Bd3 Bxc3+ 8.bxc3 h6 9.Bh4 g5

Black does without this in the main ECO line: 9...e4 10.Bc2 Qe7 (10...g5) 11.Ne2 Nbd7 12.Ba4 0-0 13.Bxd7 Bxd7 14.a4 b6=.

Rb1 Nb6 16.Bb5 Bd7? [16...Nh5=]

Here White missed a likely win by 17.Qa3!, hitting both a7 and c5(!) Since 17...a6 18.Bxa6! is a crush, that leaves 17...Kb8 18.Qxc5 Bxb5 19.Qxb5± or 17...Bxb5 18.Rxb5 Kb8 19.Qxc5 Ka8 20.Qd4±.

The pin on the d6 pawn in these lines shows why 16...Nh5! would have been correct.

17.a4?! Bxb5 18.axb5

Not that White is anxious to fix his pawns; it's just that 18.Qxb5 is embarrassed by 18...Qd7.

23...f4!?

Black sees that the a7 pawn is not defensible. Still, there is a point to 23...Ra8! – to trade one pair of rooks and keep one for the kingside: 24.Ra5 f4! 25.Rfa1 Rhf8 (a) 26.exf4 gxf4 27.Rxa7 Rxa7 28.Rxa7 f3 29.Ng3 e3+; (b) 26. Rxa7 Rxa7 27. Rxa7 fxe3 28.fxe3 Qf6 29.Qd1 Qf2+ 30.Kh1 Nxc4+.

TEXAS MASTERS

DALLAS, JAN. 16-18

GM Alejandro Ramirez scored a repeat of last year's performance at the Texas Masters, scoring 4.5 out of 5 to win \$1,500. Tied for 2nd-3rd plus U2400 with 4 were IM Davorin Kuljasevic, NM Conrad Holt and IM Salvijus Bercys, each winning \$500. Full prizes were paid out, with 27 players well over the b/20 quota.

The event, held Jan. 16-18 at the UT Dallas student union, included the Texas Class Championship, with 64 players in six divisions. Prizes were based on turnout even when sections were combined, so U1000 prizes were higher than U1200.

The sponsors were J.G.'s Old-Fashioned Hamburgers, The University of Texas-Dallas, the UTD Chess Program, the Texas Chess Association and the Dallas Chess Club.

Customary is 15.Rab1, but the advantage of supporting an a-pawn advance becomes clear in the game.

A game Saemisch-Koch, Berlin 1928, saw the obliging 15.c4 dxc4 16.Bxc4 Be6 when Black is already equal (although he lost that game).

15...Re7 16.a4 g6 17.Nd2 Ne6 18.c4

Malazarte wins in SA

Ernesto Malazarte won the Pre-Spring Open (San Antonio, Feb. 28-Mar. 1) with a perfect 4-0 score, winning \$150. Nathanael Lozano was clear second with 3 (\$90). Frank Brack, Richard Gabriel and Hector Flores with 2.5 shared the U2100 and U1900 prizes (\$40 each).

In the Reserve (U1800), Steven Dampier won with 3.5 (\$90). Tied for second plus U1700 with 3 were Daniel Lozano, Charles Davis, Louis Rimpel and James Thames (\$30 each). Gary Cobb won U1500 with 2.5 (\$45). Jonathan Rea and Fernando Mendoza tied for U1300 with 2 (\$22.50 each). Prizes were 60% of the advertised b/40 amount.

Martin Gordon directed a combined field of 28 players for the San Antonio Chess Club.

Notes by IM Mark Ginsburg

Diesen had a plus score versus many famous American grandmasters: John Fedorowicz, Michael Rohde, Joel Benjamin, Nick de Firmian, Walter Browne, Larry Christiansen and Yasser Seirawan. Mark pointed out he lost very few games to these players.

Cameron's Swindle

by Jim Marcely

It's Tuesday, boys' open chess day at St. Peter the Apostle Middle School in Houston. I have ten boys show up. After a lesson and some problems in zugzwang/stalemate, they settle down, as much as middle schoolers ever settle down, to their games. Cameron walks in late. He's always late. He a fifth grader from the elementary school at the St. Mary's, the adjacent parish. They don't have a chess program, so his grandfather trucks him over to St. Peter's for chess. His grandmother teaches social studies here.

Cameron is the eleventh player, the odd man out. "Sit down Cameron. I'll teach you something."

"Aw, Mr. Marcely. Do I hafta?"

"Yes Cameron. You hafta."

Cameron chooses White. He opens **1.e4**. I respond **1...e5**. He plays **2.a4**.

"Cameron! That's a terrible move. How many times have I told you it's too early to bring out your rook. I'll trap it, or chase it all over the place. You're gonna lose control of the center!"

I'm disappointed. Cameron has been really developing as a player. He took the sixth place trophy in a tournament just last Saturday.

I play **2...Nf6** threatening his e4 pawn. He plays **3. Bc4**.

"Cameron! You didn't protect your pawn. You just lost control of the center!"

I scoop up the pawn: **3...Nxe4**. Cameron plays **4. Ba2**.

I shake my head in dismay. What's wrong with him today? Have I been too hard on him? With measured calm, I say, "Cameron, that's a timid move. There's no reason to retreat. I haven't even tried to threaten your bishop. You're making multiple moves with the same piece for no good reason."

Cameron gives me his sullen glance. I've seen it before when I lean too hard on him.

I play **4...d6**, opening up my c bishop. Cameron plays **5.Nf3**.

Well, that makes a little more sense. Now I'll proceed to show him the consequences of poor center play in the opening.

I play **5...Bg4**, pinning his knight against his queen.

He responds **6. h3**, threatening my bishop. "A decent response, Cameron," I think to myself.

An animated conversation has erupted among the eighth grade boys. "Pipe down, guys! This is chess, not the social hour!"

I return to the game. I can back my bishop off to h5. He'll likely respond g4, threatening my bishop again, and it will be forced back to g6. I'll lose the initiative, but disrupt his castle position kingside. However, he can castle queenside, and he'll have a half-developed pawn storm on my kingside castle position. I prefer to castle kingside.

At the next table, fidgety Damon is kneeling on his chair trying to balance it on one leg as he plays chess.

"Damon! Sit in that chair like a human being. This is chess, not gymnastics 101!"

I return to the game. If I capture the pinned knight, he'll capture back with the pawn or the queen. Cameron's a good enough player that I think he'll capture with the queen. Having his queen at f3 can be a powerful position, but also a vulnerable position. His opening has been so poor that I'm sure that he won't be able to use his queen effectively from f3. Perhaps I can give Cameron an object lesson on the folly of premature development of the queen.

I decide to trade: **6...Bxf3**. He captures back with the queen: **7.Qxf3**.

Now my knight is threatened. If I retreat my knight to f6, his queen will swoop down on my b7 pawn and subsequently capture my queen-side rook or knight.

Daniel and Yovanni are involved in a touch-move dispute. I mediate.

Back to the game: If I retreat my knight to c5, I protect the b7 pawn and the integrity of my queenside position. That's a sensible move. **7...Nc5**. Cameron responds quickly, **8.Qxf7**, capturing the pawn next to my king.

I can't believe he has made such a foolish move – after all my lectures on playing slowly and deliberately. As I reach for my king to capture the offending queen, Cameron blurts out, "Checkmate!"

Checkmate? Checkmate? How can this be? I look up. Cameron has his big "Gotcha!" grin. His left index finger is tapping on his stealthy bishop at a2. He extends his right hand across the board. That devious, sneaky, underhanded young whipper-snapper has checkmated his coach in eight moves. I've been conned! Bamboozled! Snookered! Hog-tied! Sliced and diced!

I shake Cameron's hand and smile. "Great game, Cameron!" I'm proud to be his coach.

At team practice on Thursday, Cameron beats Isaiah with the same trap. Isaiah is our second best player. Cameron also tells me he won one of his games at the last chess tournament using it. I ask if he read about this elegant variation on the Scholar's Mate in his chess magazine. He assures me he figured it out himself. I'm sure others have played it over the centuries, and perhaps named it, but I call it Cameron's Swindle.
